

Date: 9/14

Wednesday Challenge Form

Group Members: Alvin, Krish, Lucas, Zachary

Problem Statement: cut and sand an uneven wooden block down to two inches on the dot

Approach: We measured with a ruler as close as possible to two inches then put the block in a clamp and used a saw to cut it. After we cut it we would measure and sand the block over and over until we were satisfied.

Solution: all of the groups did just as good as each other but only one was dead on

Lessons Learned: We can always take off more but we can't add on anything we cut off
