## Wednesday Challenge Form

Group Members: Zachary, Paul, Jacob,  
Johnathan, Carlos

Problem Statement: We had to make a boat tail  
For a rocket without using or making an actual  
Rocket

Approach: On our first day Jacob was with us  
and had to do everything for us since we could  
not understand what was happening. The  
second day he was absent and we regretted  
having him do everything since we were even  
more confused.

Solution: We had a finished product and it was  
Poorly made

Lessons Learned: Don't have others do the work  
For you if you don't understand
