

Date: 2/1

Wednesday Challenge Form

Group Members: Zachary, Alex, Armin,
Jonathan

Problem Statement: During the last Wednesday challenge we had to build trinkets and then the judges would choose one of the trinkets. For this challenge we had to build our Version of the trinket that was chosen

Approach: For our approach we let Alex do most of the work since he was experienced with this type of creation and we didn't know what to do anyways. He chose to build it simply with cardboard and a wooden pole that Jon had found in the shop.

Solution: We ended up not winning which was Unfortunate but highly likely

Lessons Learned: We learned how to make a simple flying thingy
