

Wednesday Challenge Form

Group Members: half the class

Problem Statement: everyone got a tube, they could only use their right hand and they had to toss it to the person to their left while catching a tube from the person to their right

Approach: We chose to watch the other team and use their strategy which was to practice over and over each variation of tossing until we could do them perfectly and then we did the whole thing at once

Solution: our team won

Lessons Learned: teamwork is an important and valuable skill
